WHO official: 'we may have to **enter homes and remove family members**'

World Health Organization official warns it may enter your home, and take a family member over coronavirus

Dr Tedros became a member of the Tigray People's Liberation Front (TPLF), which was in the vanguard of the 1991 overthrow of Ethiopia's Marxist dictator, Mengistu Haile Mariam.

As a government minister from 2005, he was seen as more approachable and friendly than some of his more austere TPLF comrades.

He has been praised for reforming the health sector and improving access to health care in Ethiopia, Africa's most populous state after Nigeria.

But when he was in charge, his ministry was known to discourage journalists from reporting about suspected cholera cases in the country.

'Coaxing China'

During his highly efficient and ultimately successful campaign to lead the WHO, Dr Tedros' supporters dismissed allegations that he had covered up cholera outbreaks.

That is why "persuasive" and "political" are also words which crop up regularly when discussing his leadership of the WHO.

WHO Director Was Top Member of Violent Ethiopian Communist Party

By Ken Webster jr

You know that globalist arm of the United Nations who have recently been responsible for spreading misinformation about the COVID19 crisis to people all over the world?

It turns out one of the top members of the World Health Organization is a former member of the violent Ethiopian communist party.

This is the same group of people who denied emergency medical treatment to an ethnic group.

Tedros Adhanom Ghebreyesus is accused of personally overseeing the extradition of dissidents who were later imprisoned and tortured.

The Summit News reports:

Tedros Adhanom Ghebreyesus has repeatedly parroted Chinese Communist Party talking points, constantly heaping praise on Beijing's response to coronavirus despite the fact that China hid the truth about its spread and viciously silenced scientists and doctors who tried to warn the world.

Now we know why.

As John Martin explains in his excellent piece 'The Crimes of Tedros Adhanom', during his time in Ethiopia, the WHO chief was a member of the Tigray People's Liberation Front (TPLF), a violent communist revolutionary party which was listed as a terrorist organization by the U.S. government in the 90's.

According to one Ethiopian newspaper, Adhanom was listed as the 3rd most important member of the politbureau standing committee in the TPLF.

Martin writes how the TPLF engaged in "systematic discrimination and human rights abuses" by refusing emergency healthcare to the Amhara ethnic group because of their affiliation with the opposition party. The Ministry of Health that oversaw these abuses was led at the time by Tedros Adhanom Ghebreyesus.

The Crimes of Tedros Adhanom

JOHN MARTIN

WHO's Tedros Adhanom Should be put on Trial for
Crimes Against Humanity

Tedros Adhanom Ghebreyesus, as well as being the first WHO director without a medical degree, also has a somewhat political background compared to his predecessors. On his online biography, the WHO lays out his qualifications as Ethiopian Minister of Health from 2002 to 2012, impressive stuff.

Aside from his medical credentials, Tedros happens to be a member of the Tigray People's Liberation Front (TPLF) which is an organisation about as peaceful as its name suggests. Founded as a communist revolutionary party that came to power in 1991, it led a guerrilla campaign against the Mengistu dictatorship and formed a coalition with two other ethnic parties after his exile.

Not content with denying aid to political dissidents, Tedros was also health minister at a time when the regime was accused of covering up epidemics. A cholera outbreak spread the region in 2007, infecting thousands in neighbouring countries. When it spread to Ethiopia, the government simply renamed the outbreak and called it Acute Watery Diarrhoea (AWD). International organisations were **pressured** not to call it Cholera (despite the UN testing the infected and finding Cholera), and were pressured by government employees not to reveal the number of infected. Another stunning victory for the health minister.

The Amhara people have reported systematic discrimination and human rights abuses by the current government. Humans Rights Watch in 2010 wrote a report on how aid in the form of food and fertiliser was withheld from local Amhara villagers because of their affiliations with the opposition party. Other forms of aid denial involved the refusal of emergency healthcare by ministry of health workers; the same ministry which was at the time being led by one Tedros Adhanom.

But after his shining accomplishments in health, Tedros had bigger fish to fry. In 2012 he was appointed foreign minister and there quickly followed a crackdown on journalists and government opponents in the country, and an attempt to extradite those who had fled to Yemen in exile. The two countries entered negotiations to track down and deport dissidents from Yemen and imprison them in Ethiopia. Tedros himself led these negotiations, there's even a nice picture of the medical man during the talks with the Yemeni foreign minister.

Tedros Adhanom played a key role in kidnapping of prominent dissident

In his bid to win the position of Director-General for the World Health Organization (WHO), Dr. Tedros Adhanom Ghebreyesus is playing a nice technocrat. At every venue and opportunity, he presents himself as a humble, smiley and caring and humanitarian who loses sleep over the state of world health. But his 12-page campaign CV never mentions his most important experience that made it possible for him to climb the ladder of power within the tyrannical regime oppressing and misruling Ethiopia.

Tedros Adhanom with Zenawi and other TPLF executives including Abay Tsehaye and Abay Worldu

Tedros of course takes every chance he can to praise the good governance of China, and given the human rights record of the People's Republic, it's no wonder he likes them so much. From projects like media propaganda centres, mass relocations, and social credit style score cards, Ethiopia's governance in many ways resembles a carbon copy of the Chinese authoritarian model. Complete with a one party state and focus on profit over human rights.

Ethiopia , until very recently, remained one of the world's worst human rights violators, receiving a score of 19 out of 100 on the human freedom index for 2018, and a score of 150 out of 180 for freedom of the press. The government has remained in power since the takeover in 1991, and was seemingly so popular that it won more than one election by 100% of the vote.

How Does Someone With This Track Record Become
Director of The World Health Organization?

So how did a man with a record like Tedros become director of the WHO? It's quite simple really, the WHO has been riddled with scandal after scandal for some time now. Facing almost no rise in budgets during the 1990s, the WHO turned towards the corporate sector for additional funding, and by 2008, corporate donations made up 80% of the organisation's budget.

According to health researcher Soniah Shah, the role that large drug companies played in shaping global health policy created a serious conflict of interest on the one hand to improve the companies' public image, but on the other to protect their financial interests. This led to cases like lobbying to weaken patent laws for new drugs in India, and blocking laws in South Africa that attempted to make HIV treatment more accessible.

The Bill and Melinda Gates Foundation played a large role in promoting Tedros. After their large investments into healthcare programs in Ethiopia which Tedros had facilitated, the foundation was keen to promote similar programs on a global level and donated billions to the WHO towards this end.

Liz Cheney Calls WHO's Tedros 'A Puppet of the Chinese Communist Party'

Representative Liz Cheney (R., Wyo.) slammed the World Health Organization's director general Tedros Adhanom for being "a puppet of the Chinese Communist Party" over the organization's response to the Wuhan coronavirus pandemic.

The Florida Republican, a noted China hawk, has long raised concerns about the WHO’s relationship with Beijing, which has undercounted the number of coronavirus cases in the country.

Dr Tedros was born in 1965 in Asmara, which became Eritrea's capital after independence from Ethiopia in 1991, and grew up in northern Ethiopia's Tigray region.

One formative, and now motivating experience, was the death of a younger brother, who was around four years old at the time, **he told Time magazine in November**. Later, as a student, Dr Tedros came to suspect it was measles that killed him.

"I didn't accept it; I don't accept it even now," he was quoted as saying, adding that it was unfair that a child should die from a preventable disease just because he was born in the wrong place.

"All roads should lead to universal health coverage. I will not rest until we have met this," he told the World Health Assembly shortly before his election as WHO chief.

The nation of 31 million is descending into chaos — a situation so desperate that HIV and cancer patients are going without treatment and parents are surrendering their hungry children to orphanages. But the government is doubling down on efforts to portray an alternative reality. For Venezuelans, each day brings a new barrage of propaganda on state media depicting a country that few of them recognize.

Fr. Arturo Sosa Abascal, a Venezuelan Communist and Modernist, is carrying out Francis's agenda.

Understanding the adage that personnel is policy, Pope Francis has been planting Marxists throughout the Church, including at the top of the troubled religious order to which he belongs. In 2016, the Jesuits, with the blessing of Pope Francis, installed as its general superior a Venezuelan, Fr. Arturo Sosa Abascal, whose communist convictions have long been known.

Sosa has written about the “Marxist mediation of the Christian Faith,” arguing that the Church should “understand the existence of Christians who simultaneously call themselves Marxists and commit themselves to the transformation of the capitalist society into a socialist society.” In 1989, he signed a letter praising Fidel Castro.

The Catholic Case for Communism

Dean Dettloff
July 23, 2019

In fact, although the Catholic Church officially teaches that private property is a natural right, this teaching also comes with the proviso that private property is always subordinate to the common good. So subordinate, says Pope Francis in a truly radical moment in "[*Laudato Si'*](#)," that "The Christian tradition has never recognized the right to private property as absolute or inviolable, and has stressed the social purpose of all forms of private property."

Something like this is paralleled in "[*The Communist Manifesto*](#)," when Marx and Engels underscore that abolishing private property means abolishing not personal property, or the kinds of things an artisan or farmer might own, but the amassed property held by the rich, which divides human beings into antagonistic classes of people—in other words, the kind of private property that most of us do not have.

"You are horrified at our intending to do away with private property," Marx and Engels say to their bourgeois detractors. "But in your existing society, private property is already done away with for nine-tenths of the population; its existence for the few is solely due to its non-existence in the hands of those nine-tenths."

Pope Francis invites religious, political leaders to sign 'Global Pact' for 'new humanism'

The pope enthusiastically supports a global educational pact almost completely devoid of references to God.

“A global educational pact is needed to educate us in universal solidarity and a new humanism,” Francis said in a video message to launch the initiative.

A Vatican-backed website launched to promote the pact added: “Educating young people in fraternity, in learning to overcome divisions and conflicts, promote hospitality, justice and peace: Pope Francis has invited everyone who cares about the education of the young generation to sign a Global Pact, to create a global change of mentality through education.”

A large group of George Floyd protesters knelt in the middle of a street in Manhattan, New York, on Saturday and repeated phrases chanted by an activist. "Repeat after me," a man with a megaphone told the group as they held signs with phrases such as "Defund the Police" and "Black Lives Matter" written on them.

Value of work vs. throw-away culture

The Holy Father concluded the preface with a reflection on human labor as a sacred right that must be safeguarded, in line with the Social Doctrine of the Church.

"Popular movements are a concrete, tangible witness demonstrating that it is possible to contrast our throw-away culture... with the creation of new forms of work that are centered on solidarity and the community".

Finally, Pope Francis called for a "new humanism" to overcome the lack of compassion and care for the common good which has become so prevalent in our day.

Pope to Academy for Life: Promote humanism of fraternity

On the 25th anniversary of the foundation of the Pontifical Academy for Life, Pope Francis calls on its members to **promote human fraternity and a humanism of life.**

By Christopher Wells

God's dream

"The human community is God's dream even from before the creation of the world," the Pope said, emphasizing that we must "grow in the awareness of our common origin in God's love and creative act." He explained that "in our time, the Church is called once more to propose the humanism of the life that bursts forth from God's passion for human beings."

JESUIT CHIEF DEFENDS LIBERATION THEOLOGY AND SOCIAL ACTIVISM

By Kenneth A. Briggs

Oct. 28, 1984

The head of the Jesuit order says he strongly supports Latin American theologians and church workers who seek to promote social justice. And he says the teachings known as the theology of liberation must be "recognized as possible and necessary."

The Vatican recently criticized some elements of liberation theology as relying too heavily on Marxist analysis, but it affirmed the church's fight against oppression in Central and South America.

The Rev. Peter-Hans Kolvenbach, chosen as Superior General of the Jesuits a year ago, said in an interview in New York last week that the order would continue to aid efforts for social justice in Latin America.

IPS: As Climate Crisis Worsens & Poverty Rises, U.N. Appears Off-Track on Development Agenda

“The two key goals in the U.N.’s development agenda are the eradication of extreme poverty and hunger by 2030. But most of the world’s developing nations, currently fighting a losing battle against rising poverty and hunger — and suffering from the devastating impact of climate change — are likely to miss the deadline for most of the 17 Sustainable Development Goals (SDGs), according to the latest report by Secretary-General António Guterres...” (Deen, 9/18).

**Global solidarity is not only
a moral imperative,**

The agenda, though, is clear, and it has nothing to do with “protecting refugees” or “humanitarianism.” Guterres and his fellow globalist-socialist extremists are not fooling everyone. In Hungary, for example, Prime Minister Viktor Orban has **blasted what he termed a “criminal conspiracy”** of internationalist fanatics. In essence, he has argued in multiple speeches that these globalist conspirators, based largely in European Union HQ in Brussels, were using mass Islamic immigration as a weapon to undermine Western civilization, Christendom, and the nation-state on the road toward what globalists often refer to as their “New World Order.”

He is right, as even top Insiders such as former Goldman Sachs boss and Bilderberg leader Peter Sutherland, in his capacity as UN migration czar, explained publicly. In an interview posted on the UN's own website, Sutherland **said he would urge governments** to “recognize that sovereignty is an illusion — that sovereignty is an absolute illusion that has to be put behind us.” He also said “the days of hiding behind borders and fences are long gone.” Westerners must take on “some of the old shibboleths” and “the old historic memories and images of our own country” and realize that we are all “part of humankind.” In other words, no more nations, no more borders — just global totalitarian rule, with people like Sutherland and his extremist cohorts at the helm.

China is a model of Catholic social teaching, protector of human dignity, bishop says

BY CATHOLIC NEWS AGENCY

Bishop Marcelo Sanchez Sorondo, an Argentinian, is chancellor of the Pontifical Academy of Sciences and the Pontifical Academy of Social Sciences. In an interview with **Vatican Insider**, he recently said that “at this moment, those who best realize the social doctrine of the Church are the Chinese.”

Sorondo told Vatican Insider that he had recently visited China, where he says he found that “they [the Chinese] seek the common good, subordinate things to the general good.”

“I found an extraordinary China; what people do not know is that the central Chinese principle is ‘work, work, work.’ ...As Paul said: ‘he who does not work, who does not eat.’ You do not have shantytowns, you do not have drugs, young people do not have drugs. There is a positive national consciousness, they want to show that they have changed, they already accept private property,” he said of his trip.

The bishop said that the People’s Republic of China has “defended the dignity of the human person,” and, in the area of climate change, is “assuming a moral leadership that others have abandoned.”

KEY POINTS

- President Donald Trump has ordered General Motors to make ventilators under the Defense Production Act.
- The Korean War-era statute can force certain American companies to produce materials that are in short supply in the face of the growing outbreak.
- The order does not change GM's previously announced plans or schedule to produce the ventilators, according to the company.
