

00:27

hello to all the viewers we are back

00:30

with another episode of what's up Rafa

00:32

this is a special episode we are going

00:35

to continue discussing the coronavirus

00:39

because it's such a relevant topic at

00:42

this stage and without wasting any time

00:45

hello Walter

00:46

I will you peace open for us with a word

00:49

of Prayer

00:49

absolutely Heavenly Father there are

00:54

momentous events taking place in the

00:57

world and we need heavenly wisdom to

01:00

unravel them so I pray for your spirit

01:03

and your guidance in Jesus name Amen the

01:09

developments around the coronavirus has

01:11

escalated through many ously in the last

01:13

few days the world we woke up to last

01:18

week is not the world we woke up to this

01:20

mortal can you tell us some information

01:25

that you've received what's going on in

01:27

the what's going on in the world well

01:29

let me let me start off right from the

01:33

beginning of the bat that there are so

01:37
many stories about the coronavirus on
01:40
the internet for example there were a
01:43
number of prophecies and people are all
01:46
hyped up about the prophecies Sylvia
01:48
brown predicted that in the year 2020
01:53
there would be this virus and it would
01:55
stay for a short time and go away there
01:57
were books written prior to that and
02:00
explaining that these things would come
02:03
there were TED talks by gates for
02:09
example that this was something that was
02:13
on the horizon not just a possibility
02:16
but a probability there were movies that
02:20
were made about these things contagion
02:24
and
02:24
the movies so it seems as if the mind of
02:27
humanity has been put into a groove to
02:31
accept the inevitability of such an
02:34
event now let me say right from the
02:38
beginning this is not a program where we
02:41
are going to discuss any one of these
02:45
theories or get into conspiracy theories
02:49
around about this issue and we're not

02:53
going to discuss whether all of these
02:56
things are legitimate or not legitimate
02:59
when we are we have to err on the side
03:02
of caution
03:03
that means we accept that the
03:07
information that we have is genuine to
03:12
an extent and we even go along with any
03:15
legislations that are in the pipeline
03:18
and we try to be responsible citizens so
03:24
that is off the bat and of course if
03:29
legislation should be enacted which is
03:31
contrary to God's law then that becomes
03:34
a different story so today I don't
03:37
really want to talk about the legitimacy
03:40
necessarily we'll mention one or two
03:43
things and about the the fact that you
03:47
know this is a crisis I want to talk
03:50
more about what is the outcome wizard
03:54
actually heading this and what is the
03:56
possible or probable outcome and we need
04:00
some some sound information regarding
04:04
this now there have been a number of
04:07
developments and escalations for example

04:10
the German government announced major
04:13
escalations
04:14
in terms of restrictions on humanity and
04:19
freedom of association and all of these
04:22
issues and there was a very interesting
04:25
discussion on television in Germany I
04:29
think it was yesterday and it's
04:32
brand-new if I can just give some
04:36
information it was by the Institute for
04:41
science research and community politics
04:46
in German that would be Institute for
04:50
Vision shafts for Chaumont gazelle
04:52
shafts politic and a expert in the field
04:58
of Epidemiology and an expert in
05:01
respiratory diseases dr. Wolfgang
05:06
verdict was the spokesman and I found it
05:11
fascinating we can't play it for the
05:13
viewers because it's in German but I
05:16
found it fascinating that he was totally
05:19
surprised at the way in which this thing
05:23
was being handled because he said that
05:27
the virus the corona virus forms a part
05:33
of the general flu population of viruses

05:37
and even if the percentage amidst all
05:40
the other flu viruses is up to 15% then
05:44
never in the past when they were veralyn
05:47
tyrus --is around was one virus isolated
05:52
from the rest of the group and made the
05:55
object of so much attention yes correct
05:58
and he mentioned for example the swine
06:02
flu which is a very serious flu and
06:06
affected numerous people never in the
06:08
past was this removed from the package
06:11
of viruses and made a special subject
06:14
for pandemics the same with the bird flu
06:20
the HN viruses and they also weren't
06:25
isolated and when there was testing done
06:29
then it wasn't isolated from the
06:32
made the subject for special rules and
06:34
regulations and he says the same should
06:38
apply for this and he doesn't understand
06:42
why there is such a hype and who
06:46
benefits from the hype and this is an
06:50
interesting point that he raised he gave
06:54
various statistics and outcomes and it
06:58
was a very interesting discussion

07:00
nevertheless there was a document that
07:04
was released by the German government in
07:08
other words an official document and
07:11
that document was called let me just get
07:15
my information here it came from the
07:18
Deutsche Bundesbank in other words it's
07:20
a official document and it's talks AAHA
07:23
zips in that means press release 17 / 1
07:31
2 0 5 1 and it was released in 2013 and
07:36
based on research in this field around
07:41
possible epidemics and catastrophes and
07:45
how the state should respond to those
07:49
and I found this document so fascinating
07:54
because it comes from 2012 yes so you
07:59
know that's 8 years ago that's quite a
08:02
long time ago and the first part of the
08:05
document deals with flooding and what
08:09
the governmental response should be
08:11
should there be a large amount of
08:14
flooding and then the second half of the
08:16
document deals with risk analysis and
08:22
protecting the population against the
08:26
pandemic by a virus such as Modi sauce

08:31
and I have the document before me and I
08:35
find it fascinating because it is like a
08:40
blueprint of what we are seeing
08:43
the world today in fact it mirrors its
08:47
so exactly it's like a script it's like
08:53
a script and I find that incredibly
08:56
interesting and if I can go back to the
09:01
movies that were made these movies are
09:04
of course also possible scripts of
09:08
possible outcomes of events and I've
09:12
always in my previous lectures spoken
09:14
about the The Hollywood world as nothing
09:19
other than Jesuit theater so are we
09:23
following a script is the possibility
09:25
again let me reiterate this is not about
09:29
whether this is real or whether it is
09:31
not real we're talking about the
09:33
possible outcomes in terms of the
09:36
prophetic ramifications of such an
09:39
outbreak so when I go through this
09:42
document this remember 2012 that's a
09:47
long time ago yes and apparently that is
09:50
about the time when the coronavirus made

09:54
its first appearance even in Germany and
09:57
was then labeled as a possible vehicle
10:01
for this kind of pandemic so the
10:05
document gives a analysis of how this
10:10
thing will pan out and it says what is
10:15
the probability of this thing happening
10:18
and I say highly probable so this is
10:23
going to happen yes so it's it's a it's
10:26
a blueprint for how to react when it
10:28
does happen they have a table right in
10:32
the beginning where they look at the
10:36
ramifications and the damage that will
10:40
be caused by such an outbreak and they
10:44
later on in the document give you the
10:48
numbers that are involved now Angela
10:52
Merkel just recently had
10:55
a public announcing where she had very
11:00
grave appearance and said that 70% of
11:05
the people will probably be affected by
11:08
this virus yes
11:10
now the start of Afghan voter also was
11:16
asked the same question what about what
11:19
about the the ramification that so many

11:21
people should be infected and he said
11:25
you know what if you go into a epidemic
11:29
or just a normal flu scenario then
11:34
people get the flu yeah and over a
11:38
period of time it can be up to 70% of
11:42
the population that has the flu if you
11:44
ask someone did you get a flu posture
11:47
then most of the people will say yes and
11:51
some people will say no I escaped the
11:55
flu this year
11:56
yes but most will say they had it at
11:59
least once so if a couple escaped then a
12:03
70% getting the flu is nothing out of
12:07
the ordinary but if there is no direct
12:11
proof as to which virus caused that flu
12:15
then it gets dumped into this big basket
12:18
which is called flu and if you have
12:22
enough of this hype then everybody has
12:24
now got the so virus it's interesting to
12:27
me that in America there was this
12:31
article where doctor mark Segal said
12:36
well this is this is very strange
12:38
because they have all of these people

12:41
but number one they're not supposed to
12:43
see them because they are infectious so
12:47
you must basically have an interview
12:50
with them over the phone to see whatever
12:52
it is and then the test kits aren't
12:55
generally available as to which specific
12:58
virus you are testing for and so most of
13:01
these people are not really tested the
13:04
test kits are not available and so you
13:07
don't actually see them
13:09
they are at home and you do not test
13:13
them but and they laugh the symptoms but
13:15
you don't know are they're just normal
13:17
symptoms that are associated with a
13:20
normal flu or not even the labs are not
13:23
gonna taste the taste Steve they sent it
13:25
exactly because there could be a risk of
13:28
them being infected so this is this is
13:31
rather strange so if you go back to this
13:34
this graphic representation of what the
13:38
effect will be it is divided into
13:41
categories of what is the effect on the
13:45
human being what is the effect on the

13:48
environment what is the effect on the
13:51
economy and what is the other other
13:57
effects and we'll talk about some of
13:59
them now deaths they're talking here
14:04
about categories from A to E and the
14:09
maximum there in E is supposed to be run
14:12
about seven and a half million deaths as
14:15
a consequence so the impact they say on
14:19
humanity is going to be very high with
14:22
million seven and a half million
14:25
probable deaths
14:27
injured or people that are sick in the
14:30
same number of catching in the same
14:32
category and those that need help again
14:37
maximum so we're talking in the millions
14:40
and then a very interesting category
14:43
those that went missing yeah and that is
14:48
a relatively high number so if we
14:51
consider that the maximum here is seven
14:53
and a half million then the number of
14:56
missing people here could be between a
15:00
third and half of that yes so that's
15:04
quite a number of people just gone

15:06
missing and I explained it by saying
15:08
well maybe they were on a trip and
15:10
didn't come back or whatever they're
15:13
just gone and then as to the impact on
15:17
the environment
15:18
any damage to the environment or certain
15:23
areas of the environment or buildings or
15:25
ground waters or useful surfaces zero
15:32
damage then some of the animal kingdom
15:39
especially those that are in the
15:41
agricultural sector there might be
15:43
minimal damage as far as they are
15:46
concerned so the damage lies with human
15:51
beings and then the next one is a very
15:54
interesting category with maximum damage
15:58
and that is the economy the people's
16:02
economy in other words the men on the
16:05
street not necessarily the big companies
16:08
but the general economy it is to have a
16:11
major major impact and then also impact
16:18
on the public order will be very high
16:23
that means you can expect disobedience
16:28
of obedience you can expect riots you

16:31
can expect all of these things and the
16:34
political ramifications will be massive
16:37
and the psychological ramifications will
16:41
be massive and then cultural heritage
16:46
sites they won't be affected at all so
16:49
it seems as if the economy especially
16:52
the people's economy humanity in general
16:55
and the political ramifications will be
16:58
maximum but now what fascinates me about
17:02
this document is the detail because it's
17:06
quite a long document the whole document
17:08
is well over 80 pages and this is
17:11
probably two-thirds of the document
17:14
dealing with this and I think to deal
17:16
with the whole document just highlight a
17:18
few points number one this pandemic will
17:21
be worldwide it will be a worldwide
17:24
pandemic
17:25
because you cannot contain a virus
17:28
obviously and what will be the probable
17:31
vector what will be the one that will
17:33
cause the problem so the scenario is
17:36
that the heavier is a hypothetical Modi

17:40
SARS virus and then they say for example
17:46
SARS coronavirus Co V well that's
17:50
interesting that is now eight years ago
17:54
so the probable virus could be the
17:58
corona virus or then they throw in there
18:00
the h5n1 influenza virus or even some
18:05
other and like HIV or something but the
18:08
first one they mentioned is such corona
18:12
virus covary and and this virus was
18:16
first isolated around about 2012 in six
18:21
patients now it's interesting that if
18:24
you take that same number today that's
18:26
also where it would have started yes but
18:28
there was no pandemic at that stage
18:31
regarding this virus now let's describe
18:36
what happens they're saying in this org
18:38
in this article they're talking about
18:41
the incubation time of the virus and how
18:45
long it will take before you develop
18:46
symptoms that would be five days then 14
18:52
days before it manifests itself strongly
18:56
and what it does it detects respiratory
19:00
system and you can become dizzy and you

19:03
can get cramps and be and the lethality
19:06
and now let all of it is an interesting
19:08
term it's those that will die as a
19:13
consequence of the infection in other
19:16
words not of the whole population but of
19:19
those that infect it will be high so
19:23
what does that really mean and then
19:27
where will it appear that's interesting
19:31
they say it will appear or be manifested
19:35
particularly in Asia North America
19:38
and Europe yes now that's interesting
19:42
why not in the rest well one of the
19:48
reasons why they could actually say that
19:51
probably is because of the next data
19:55
which they will say so initially it will
20:00
only be ten cases in Germany and then it
20:04
will spread out until virtually 70
20:07
percent of the population as Angela
20:09
Merkel said would get this now when will
20:15
this happen exactly and they say this
20:20
will occur in February in Asia now isn't
20:27
it interesting that this virus broke out
20:30
in Asia in February now this is eight

20:34
years ago that they're saying that it'll
20:37
probably come from Asia and then a
20:42
couple of weeks later its dimensions
20:45
will be realized and then in April it
20:49
will be identified as motifs are
20:53
coronavirus and then it will come to
20:57
Europe and the United States so it comes
21:01
out of South East Asia which is China
21:07
and it'll come from the the market place
21:13
where the animals are and that's exactly
21:16
what happened now I find this rather
21:19
fascinating that it is following this
21:22
plan and then only to people who had
21:26
been in Asia will bring the disease to
21:29
Europe and from there it will spread
21:31
rapidly now what is interesting to me is
21:36
the duration this is very fascinating
21:40
because there's a lot of different oh
21:43
yeah
21:44
opinions about I mean it was said that
21:47
it will last only a few weeks and then
21:50
it was a few months
21:51
let's just see what they say and then

21:53
we'll get back to what some people are
21:56
saying ground so how long will this
22:01
development continue and we can we can
22:07
have new cases appearing all the time
22:12
but it seems as if the duration will
22:16
probably be three years so this document
22:21
says three years so when we get back to
22:24
what the media is saying today they said
22:27
a few weeks yeah and they said three
22:30
months then I think Donald Trump said
22:34
six months and now the latest already is
22:38
an announcement in Germany that the
22:43
restrictions as a consequence of the
22:45
virus at this stage is estimated to be
22:49
about two years so we're getting really
22:51
close to the three years and then they
22:54
have a graph here as to how it pans on
22:56
and you will see on the graph that on
23:00
the one hand they have the number of
23:03
people that get sick in percentage and
23:06
at the bottom they have a three year
23:09
period in days so there's 360 days
23:14
that's one year and then they'll have

23:16

two years and three years so they are

23:18

planning for a three period for this

23:22

virus and then how it will develop and

23:27

how many people will get sick we've

23:29

looked at these data on that little

23:32

graph that we looked at so we won't have

23:35

to go into any of those details so what

23:39

would be the impact well the impact will

23:42

be major because it will affect not only

23:46

Europe it will affect the entire world

23:49

so the next question is what measures

23:51

will be put in place to curtail the

23:54

virus well one of the first one of

23:57

course is quarantine yes

23:58

and particularly self quarantine now

24:02

it's interesting that as we go through

24:06

you'll see this is exactly how it was

24:09

handled so this is the blueprint and as

24:13

far as I can see we are following the

24:16

blueprint to a tee at the moment with

24:19

one announcement after the other it's

24:21

interesting that they say that there

24:23

will not be one specific way in which

24:26
the various countries will deal with it
24:28
there are different blueprints for how
24:31
to deal with it and different countries
24:33
will use different means and the impacts
24:38
will probably vary and this will have
24:40
major political repercussions because
24:42
some people will play the game the blame
24:45
game you know and ask now you know who
24:48
did the right thing and who didn't do
24:50
the right thing and it's interesting
24:53
that politically also with the
24:56
disappearances it gets interesting
24:59
because some of the critics in China is
25:01
I've just disappeared nobody knows where
25:04
there are news so it will be isolation
25:10
and home isolation and then there will
25:13
be other but there will be a reduction
25:17
in your basic rights now here's a list
25:23
that is fascinating and the right to
25:28
your privacy in your home will also be
25:31
curtailed in other words even within
25:35
your homes fear the arm of the law will
25:40
be noticeable and the freedom your basic

25:46
human freedom will be curtailed
25:51
furthermore by government decree people
25:55
can be compelled to be subjected to
25:59
inoculation for example or other
26:03
measures which they might prescribe okay
26:07
so they say that the ramifications in
26:10
terms of your your social life will be
26:14
astronaut
26:15
yes astronomical in other words let's
26:19
put it bluntly life will change
26:21
completely now not just for a week or a
26:27
month but we're talking yes one of the
26:31
consequences of course is that vacations
26:34
will be canceled or will have to be
26:39
postponed this will have drastic effects
26:43
on on the tourist industry so the
26:47
tourist industry will be terribly
26:50
effectiveness now we live in my part of
26:54
the world this part of the world
26:56
survives 100% almost on the tourist
26:59
industry yes so if this really pans out
27:03
the way that they are saying then I
27:07
think there will be serious

27:09
repercussions in the area where we will
27:13
live so which areas will be particularly
27:16
affected the energy sector for example
27:19
electricity gas and and mineral oils etc
27:23
should not be affected so that will
27:26
continue telecommunication and
27:28
information that will continue as far as
27:33
air traffic is concerned there will be
27:36
massive repercussions
27:39
the only flights that will probably
27:41
still be allowed would be frightful i'ts
27:43
as far as the shipping industry is
27:50
concerned freight will continue but of
27:53
course wherever people have that will be
27:57
curtailed so the tourist industry and
28:00
then they go into the various categories
28:02
and then they also talk interestingly
28:05
about traffic in other words the number
28:10
of cars on the road initially that'll
28:13
increase dramatically because people
28:15
won't be able to take part in public
28:17
transport because that's when people
28:19
come together yes and because that will

28:22
put an extra load on the roads they will
28:25
have to be restrictions in terms of the
28:27
as well and there will be massive
28:31
logistical problems in bringing food
28:33
into the area because some borders will
28:37
now be activated that might not have
28:39
been activated before and I find it
28:42
interesting that Poland for example
28:45
which is part of the EU yes is now not
28:49
able to bring its trucks in and out so
28:53
the the borders that were gone on now
28:55
their Italy is less or this has been a
28:57
comma so all of these various areas are
29:01
impacted even though they shouldn't be
29:04
there will be of course massive impacts
29:07
on on the medical sphere and on
29:11
pharmaceuticals also very interesting is
29:16
nutrition now the production of food
29:23
will continue but it will be majorly
29:27
impacted because the people will be sick
29:30
the farmers will be sick some of them
29:32
will be dying so there will be a massive
29:35
reduction including the massive

29:37
reduction of food coming into the area
29:40
so it seems as though a simplified
29:43
lifestyle is on the cards yes and life
29:48
as usual with luxury and all of those
29:51
things will be a thing of the past it
29:54
reminds me of the regulations in the
29:58
Second World War
29:59
yes or even in the first when there were
30:03
such major restrictions on food and for
30:07
example certain luxury items like flour
30:11
white flour was not allowed it was
30:14
permitted it was forbidden by law only
30:16
the military was allowed to get some of
30:19
these things and you know what's
30:21
fascinating in Sweden for example and in
30:26
Norway in the Nordic countries all the
30:29
meat and all the pork production was
30:32
confiscated because it went to the
30:34
military in World War II during the
30:37
World War II yes when the Nazi regime
30:39
was trying to take over the world all of
30:43
those food items went to the military
30:45
and the people had to revert to a very

30:49
simple lifestyle and disease dropped
30:53
race yes heart disease cancer the graph
30:58
just dropped precipitously and the
31:01
people were healthy but in the middle of
31:04
raising so that for example Romo had to
31:10
add one stage for bed the eating of poke
31:13
because his soldiers was eased as a
31:15
consequence so on the one hand this is
31:19
bad news on the other hand it might not
31:22
be such bad news you know what there's a
31:27
statement that I have read where it says
31:29
that what we eat impacts the mind yes
31:33
and if we had a simpler diet we might
31:36
have better discernment as to what is
31:38
going on so maybe this is a mechanism
31:41
even though it is in this pandemic
31:45
scenario to get mankind to get a clearer
31:48
mind because the issue is much larger
31:52
than a virus in my opinion so yes there
31:56
will be major impact on the way we
32:00
survive and I'm sure that some people
32:02
will have serious problems with that so
32:06
the banks will continue and the stock

32:09
exchange will continue and Parliament
32:12
and all of these will continue the
32:15
justice system will be impacted I found
32:18
it interesting that they said for
32:20
example that juries will no longer be
32:23
allowed okay because of yeah so one
32:26
judge will decide what's right or wrong
32:27
the jury is gone because then you have a
32:30
collection of people together and that's
32:32
a serious issue so there will be massive
32:37
problems when it comes to garbage and
32:40
refuse removal and they estimate that at
32:45
least 7.5 million
32:47
people will die of the virus over the
32:51
next three years now and that is only in
32:55
Germany or zet worldwide this is what
32:57
they're saying about Germany but you
33:01
know if you if you divide that by the
33:02
three years then well people die every
33:06
year and is this something that is
33:10
extraordinary now there's another thing
33:13
that might might happen there could be a
33:17
massive increase in burglaries yes as

33:20
people become more affected by the
33:25
restrictions and looting and looting and
33:28
plundering and a lot of illegal selling
33:35
of fake medication and against civil
33:40
unrest against society when I had this
33:45
when I look at the prophetic scenario I
33:47
find an interesting quote in the book
33:49
education and it says at the same time
33:53
anarchy is seeking to sweep away all law
33:57
not only divine but human the
34:00
centralizing of wealth and power the
34:02
vast combination for enriching of the
34:05
few at the expense of the many the
34:08
combination of the poorer classes for
34:10
the defense of their interests and
34:12
claims the spirit of unrest of riot and
34:16
bloodshed and the worldwide
34:18
dissemination of the same teachings that
34:21
led to the French Revolution all
34:23
attending to involve the whole world in
34:26
a struggle similar to that which
34:29
convulsed France when I when I think of
34:32
Bernie Sanders for example with his

34:35
agenda and he's railing against the
34:37
disparity between the rich and the poor
34:40
although he's not for himself right
34:42
correct didn't one of his staffers say I
34:47
said guillotine the rich guillotine the
34:49
rich this is this is so reminisce
34:52
of this statement so french revolution
34:57
sort of ideology that led to the French
35:00
Revolution are all tending to involve
35:02
the whole world is in a struggle similar
35:07
to that which convulsed France such are
35:11
the influences to be met by the youth of
35:13
today to stand amidst this upheaval they
35:17
are now to lay the foundation of
35:19
character thou shalt love the Lord thy
35:23
God with thy whole heart and with our
35:25
whole mind and with thy whole soul so if
35:29
we look at all of these political
35:31
ramifications then it is astounding that
35:35
we are following this blueprint to the T
35:37
so the airlines will no longer operate
35:43
for touristic travel or travel in
35:47
general your household will be affected

35:51
in it already
35:53
Boeing is asking for a trillion dollar
35:57
bailout to get to just keep afloat in
36:02
fact in the document they say that
36:04
governments will probably have to bail
36:06
out and other statements on the internet
36:09
that governments will have to bail out
36:11
these large industries or else they will
36:14
not survive and then of course the
36:16
psychological effects you will have to
36:21
keep away from large groups of people so
36:27
we are restricting them to below a
36:29
hundred and later maybe to below 50 so
36:34
freedom of association will change now
36:37
there is also a way besides preventing
36:41
the spread of disease to control people
36:45
so that you don't have anarchy
36:49
developing under these conditions and if
36:51
the hand of the law stretches right into
36:55
your home now what if it stretches all
36:58
the way to your communication isn't
37:01
there a law to be passed in Israel now
37:04
that

37:05
your cell phone will be monitored what
37:07
is that all about says the government
37:09
okay is a mass surveillance of Israelis
37:12
phones to curb coronavirus so there's a
37:16
lot of legislation that is being put in
37:19
place and surveillance that has been
37:22
perfected to a tea in China
37:24
yes and that same technology is
37:27
available in in the rest most countries
37:30
in the world already exactly can be used
37:34
in this situation as well so you're not
37:37
allowed to have this association and you
37:42
have to avoid public life the things
37:45
that happen in public life sport will be
37:47
influenced all of these and of course
37:52
your permission to be in certain places
37:57
at certain times so what is that what is
38:00
the impact going to be well small
38:03
industry will suffer the most already
38:05
the cafes are closing any
38:09
privately-owned little industry will not
38:12
be able to probably survive this and I
38:16
find this rather interesting and I don't

38:20
think we have to say any more about the
38:22
document because it is a blueprint that
38:24
is being followed to a tea yes is it
38:28
justified is the question that this
38:30
doctor asked and his question fascinated
38:35
me if this is orchestrated which we are
38:40
not saying it is because it's genuine
38:43
but if it were who would benefit and
38:46
whether it is orchestrated or whether it
38:50
is not orchestrated is actually
38:52
irrelevant because we are basically in
38:56
this situation for whatever reason and
39:00
it seems as if the situation is not
39:03
going to go away very soon the laws are
39:07
becoming more and more stringent and I
39:10
have a sneaking feeling
39:14
that this is either a preparation or it
39:21
is the real thing when it comes to what
39:24
we have been waiting for for a very long
39:29
time the final events on this planet and
39:35
the laws that are associated with it
39:38
will become even more fascinating if we
39:42
look into some of those but we'll come

39:44
to that in a moment if this is real and
39:49
if it's going to pan out like the
39:51
blueprint says then is it possible that
39:56
we have entered the little time of
39:58
trouble and is it possible that the
40:03
statements which we have had are slowly
40:07
coming to fulfillment I have a statement
40:11
here from Adventist home which says
40:14
again and again it was shown that our
40:17
people are to take their families away
40:20
from the cities into the country where
40:23
they can raise their own provisions for
40:27
in the future the problem of buying and
40:30
selling will be very serious one we
40:33
should now begin to hear the instruction
40:35
given us over and over again get out of
40:38
the cities into the rural districts
40:40
where the houses are not crowded closely
40:42
together and where you will be free from
40:45
the interference of enemies is there
40:49
still time or we perhaps a little bit
40:53
late already be that as it may we've had
40:58
this instruction for a long long time

41:01
and why won't you be able to buy or sell
41:05
we spoke about that in a previous
41:07
program not because your bank card is no
41:10
longer operative the banking system will
41:12
continue according to this document but
41:15
what if there is nothing on the shelf
41:17
yes and isn't that what is happening we
41:21
have the stores closing and you have all
41:23
the web pages the empty shelves now we
41:28
are living in the tiniest little town if
41:32
you blink your message news and the
41:35
stores are empty even here even here and
41:37
this is the southern tip of Africa where
41:40
none of these regulations have really
41:42
taken effect yet they are just talking
41:44
about them and if you think about Europe
41:47
the shelves are empty and I think about
41:51
a conversation I had with a young person
41:53
about a year ago and that person was
41:57
vehemently against the idea that we are
42:00
living close to the end of time and we
42:06
have a little garden it's not a very big
42:08
garden but it produces some tomatoes and

42:11
some vegetables and letters here and the
42:15
letters there and they were questioning
42:18
why we would do that
42:19
why would bother I mean why not just go
42:21
down the road and go to Costco and I
42:25
said to that young person this is a year
42:27
ago I said to this young person what if
42:31
you go to Costco and the store is empty
42:35
what if there's nothing on the Shelf
42:37
what are you gonna do then and they
42:40
looked at me as if I've fallen off a bus
42:42
and said are you crazy
42:46
it's never been like that and it won't
42:49
be like that in the future and I said
42:52
well you better pray that it stays that
42:54
way and just one year later the shelves
42:59
are empty now I'm not being a a fear
43:02
monger but if this is a reality then I
43:06
believe that we could be very close to
43:09
the time that we have been waiting for
43:11
and it's not going to be a pleasant time
43:14
it's going to be a hard time and as
43:18
anarchy increases and as laws are

43:22
enacted that enforce the new status quo
43:28
then we will see major changes in the
43:31
world now already the government's have
43:35
announced that they
43:37
released the military to take care of
43:40
some of these issues certain personnel
43:42
will be empowered to enforce these laws
43:47
already in France if you are on the
43:51
street after a certain time you will be
43:54
fine yes and these laws will become more
43:57
and more stringent hasn't Donald Trump
44:00
released the National Guard is thousand
44:04
troops in six states in response to
44:07
coronavirus and national states of
44:10
emergency have been declared in various
44:13
countries already now the next move of
44:17
the state of emergency is martial law
44:22
yes
44:22
now what if martial law is applied
44:26
because the interesting thing about
44:28
martial law is it overrides the law of
44:31
the land if that means that if martial
44:35
law is declared then the constitutions

44:37
are no longer valid
44:39
now there's another point which we need
44:42
to discuss which is absolutely
44:46
fascinating and that is the Noahide laws
44:53
now Noahide laws are cabbalistic laws
44:58
they come from the Kabbalah so Kabbalah
45:01
is Jewish mysticism and from Jewish
45:05
rabbis and according to this philosophy
45:10
which you don't find in the Bible by the
45:12
way you find it in the Talmud and if you
45:16
read the Talmud then you're reading a
45:19
fascinating document which might have
45:23
elements of the Bible in it but their
45:27
own interpretation of course is very
45:29
different for example if you read about
45:32
Jesus Christ in the Talmud then your
45:36
hair will stand on inch no offence not
45:39
yours but
45:44
but that is that is the scenario now
45:48
what on our hide laws according to this
45:52
philosophy these laws were given
45:55
originally to Adam and Eve and then of
46:00
course when that first population

46:03
disappeared it was given to the
46:06
antediluvian x' or to the to the post
46:10
eluvians which would then be known and
46:13
so now they called Noahide laws and they
46:16
proceeded sinai according to this
46:20
philosophy and therefore they are
46:22
applicable not to one people like the
46:26
Jews for example but applicable to all
46:29
humanity and you would think that these
46:33
Noahide laws would be you know just part
46:38
of the Jewish philosophy no no no
46:40
they're supposed to be a very name Noah
46:42
Hite says that they are applicable to
46:44
all of humanities now those people that
46:48
are interested in the New World Order
46:50
they say that these laws must be applied
46:54
to every nation it must become a
46:57
universal law now there are seven
47:00
Noahide laws and we don't have to go
47:03
into detail about what they say but the
47:07
first one says do not profane God's
47:10
oneness in any way and that's a very
47:14
fascinating law because do not profane

47:18
God's oneness in any way so this effects
47:22
largely the monotheistic religions and
47:25
you know that the Pope had this meeting
47:27
about monotheistic religions coming
47:30
together to work together and we spoke
47:32
about that last time about how the
47:34
Abrahamic faiths the Abrahamic faiths
47:37
religion etc etc etc now it's
47:40
interesting that everybody must adhere
47:43
to these Noahide laws do not cursed your
47:48
Creator so there's a religious element
47:50
in these laws right do not murder do not
47:54
eat the limb of a living animal this law
47:57
was apparently
47:58
added later although Adam and Eve
48:02
apparently only received six laws okay
48:04
but this one was added after the flight
48:07
if yes so you have to respect God's
48:11
creatures there's there are
48:13
environmental laws if you break this
48:15
down further so the environment will be
48:17
very important do we have those issues
48:20
today do not steal

48:22
that's an interesting Lord to me because
48:25
in the rerum Novarum the papal
48:27
encyclical it says that if you have need
48:30
you may
48:31
it's called mint you'll need out of the
48:34
riches of others which to my knowledge
48:36
is called stealing but nevertheless
48:40
you're not supposed to steal in this
48:42
perfect world which will be the new
48:46
society of humanity and then harness and
48:49
channel the human libido now that's
48:53
interesting because what does that
48:55
actually mean
48:55
it means that incest adultery rape and
49:01
homosexual relations are forbidden now
49:07
out of these only to at the moment
49:13
austell forbidden which is incest and
49:16
rape nobody
49:18
there's no law against the doctrine they
49:21
used to be laws against adultery but
49:23
they're gone and rape is still a problem
49:26
homosexuality of course is not a problem
49:28
so would these returned with a vengeance

49:31
and then seven established courts of law
49:35
and ensured justice in our world to the
49:40
point of course where if you transgress
49:42
the Noahide laws there is the
49:45
possibility of the death penalty or
49:49
punishment capital punishment correct
49:51
now are these just hypothetical laws now
49:55
if they were it would be interesting
49:58
particularly the first one do not
50:02
profane God's oneness in any way now the
50:06
Talmud is a document that
50:10
some very very negative things to say
50:13
about Jesus Christ and one of the things
50:16
that the the Talmud and the Jews and the
50:20
Bible even had against Jesus is that he
50:22
claimed that he and his father were one
50:24
yes and they picked up stones to stone
50:28
him because you are saying that you are
50:31
equal with God right so anybody
50:34
basically if you analyze it who says
50:38
that Jesus Christ is God my Lord could
50:41
come into conflict with the Noahide laws
50:45
now are there only hypothetical when the

50:48
answer is no they are not because George
50:53
Bush Senior
50:54
he made that famous speech about a new
50:58
world order where all the nations you
51:00
know work together and come together and
51:02
that this is now a distinct possibility
51:06
he actually in acted as law the Noahide
51:11
laws in 1991 correct is there a webpage
51:16
to that we've get actually you can go to
51:20
the Congress cough web page so that's
51:23
the official government weather official
51:25
government web page and then on that is
51:29
the whole section that they've entered
51:32
as a law so the no hide laws are already
51:36
on the books in the United States of
51:40
America now of course they were never
51:43
enacted because as they are written they
51:46
would be against the Constitution
51:47
correct which permits you to worship in
51:51
whatever way that you deem according to
51:54
your conscience is necessary right yes
51:56
what if the Constitution is suspended
51:59
under martial law

52:00
then the Noahide law would be active yes
52:05
that's interesting there are what about
52:08
Europe one of the previous presidents of
52:12
Europe from rompe yes by the way was
52:16
highly acclaimed by the Jesuits as one
52:20
of their men
52:21
well Lisa
52:24
that he seeks greater dissemination of
52:28
the universal values known as the
52:30
Noahide laws and then also it goes on to
52:33
say that Major General Michael Jeffrey
52:36
governor-general of Australia lamenting
52:40
family breakdowns and drug and alcohol
52:42
abuse in modern society in a 2008 later
52:45
wrote that he believed that observing
52:48
the fundamental values of the Noahide
52:50
laws can be an antidote to such ills of
52:53
society so the Noahide laws are already
52:57
law in the United States yes they're
53:00
just not active because of the
53:01
Constitution but they are already there
53:04
I find that fascinating and by a man who
53:08
said that he is for this new world order

53:11
now and it's called education day that
53:16
law huh
53:18
so it's called Education Day and the
53:21
Pope wants to bring together a meeting
53:24
on education so all of this is beginning
53:28
to come together now according to my
53:31
Bible the little Horn of Daniel chapter
53:33
7 is the papacy that's how Protestants
53:37
have seen it throughout their history
53:40
and because the criteria phat 100% it
53:44
cannot change yes and if he is the
53:47
little horn the eb is the antichrist
53:50
then he has an agenda which is
53:54
determined to dethrone jesus christ from
53:57
the throne and in this time of crisis
54:00
and it's fascinating to me that this
54:02
document that we read said three years
54:04
yes because that is the Counter
54:07
Reformation theology on the reign of the
54:11
Antichrist which will take place between
54:14
three and three and a half years right
54:16
yes so do we have the table laid for the
54:22
final events to take place on this earth

54:25
then I think yes I think yes it's a
54:29
great possibility it is possible that it
54:32
might fizzle out in two or three or four
54:34
months and business as usual
54:37
then it was a practice run yes or maybe
54:40
even a genuine occurrence
54:44
we do not know time will tell but if
54:48
this is the real thing then we could be
54:52
now in the little time of trouble yes
54:56
and according to the prophetic scenario
54:58
it will escalate and escalate and
55:01
escalate until there comes a direct
55:04
clash between God's law and man's law
55:08
yes and we know that the papal system is
55:14
deeply involved in all of this you can
55:17
just see it in the preparations done by
55:19
Jesuit theater yeah which is called
55:22
Hollywood or example and in the
55:24
philosophies that are espoused by these
55:28
individuals so I would like to say that
55:35
God's people should now stand up this is
55:40
the time to bring the loud cry message
55:44
this is the time not to be silent this

55:48
is the time to speak by every possible
55:52
means we have to warn the world because
55:56
when this comes to its final analysis
55:59
and the mark of the beast is implemented
56:01
then we will go into the big time of
56:04
trouble and the plagues will fall and it
56:08
will be too late to reach those that we
56:12
want to reach
56:13
I believe God in His mercy is permitting
56:17
all of us and even ease the final play
56:20
in the prophetic outline then he is
56:24
permitting it so that people can wake up
56:27
and people can either go with the stream
56:29
or they can follow the directives of the
56:32
Word of God as far as I am concerned and
56:36
I think as far as you are concerned the
56:40
Word of God is the standard not the
56:43
Talmud not any other document not any
56:46
Distortion
56:48
I want to know what God said
56:50
it's very important that I know what God
56:53
said and how do I find out today what
56:57
God said well it's in his Bible but I

57:03
want to know exactly what God said and
57:05
perhaps we can talk about that issue in
57:08
a subsequent discussion thank you for
57:13
listening and may God bless you and may
57:16
God give you strength and may we stand
57:18
united under the blood-stained banner of
57:22
Jesus Christ the man who died for your
57:25
and my sin and who is God manifest to
57:34
man amen thank you very much for
57:38
watching Walter I think it would be
57:41
appropriate if you closed off us also
57:43
with a word of Prayer please Heavenly
57:49
Father you have given us a blueprint in
57:51
your word and you have sketched the
57:55
developments of this world in advance
57:59
and the events that have been spoken
58:03
about in Matthew 24 seem to be unfolding
58:09
before our very eyes Heavenly Father we
58:13
are looking through a glass darkly
58:15
we do not know Lord whether this is the
58:19
final event before the great
58:22
manifestations and the coming of Christ
58:25
whether this is a practice run because

58:28

we do not know the time all we can look

58:31

at is the signs and the signs are

58:35

screaming to heaven and if this is it

58:39

Lord then I pray that you will wake up

58:42

your people that they will come out of

58:45

their slumber and that they will reunite

58:48

honor thus says the Lord because that

58:50

will be our only sure footing and may

58:53

you bless them and may you keep them

58:56

according to your power in Jesus name

58:59

Amen
